## About Me

Enthusiastic and adaptable student with a diverse range of interests and a strong desire to learn and grow. Seeking an entry-level position to apply knowledge and contribute to a company's success.

## Projects

### Blood Donation Management System

The Blood Donation Management System project helps donors connect donors with recipients and blood banks, offering a user-friendly interface for registration. It includes a comprehensive database to efficiently manage donor information, blood inventory and recipient needs.

### Vehicle Rental System

A vehicle rental website system is designed to simplify vehicle rentals for customers. It includes detailed vehicle listings, real-time availability and secure booking. The site incorporates secure payment options and includes customer reviews for transparency.

## Certifications

- Diploma of Automation explorer training UiPath.
- HTML, CSS and JavaScript for web developers from coursera
- Completion of Java training by Spoken Tutorial

## Additional Information

- Participated in project expo on "Fullstack Technovation".
- Completion of keyboard check project using JavaScript.
- Completion of C and DSA training by Qspiders.
- Completion of internship as a Python programming intern from Motion Cut.
